

BORA & PRESTIGE  
THE NEW REFERENCES

# THE NEW RANGE OF BIEN-AIR TURBINES. ERGONOMICS COMBINED WITH PERFORMANCE.

The new line of Bien-Air turbines combines avant-garde technology with exceptional ergonomics. Their characteristic cutting-edge performance has been further optimised. Their pure, sober lines make them simply unique.

## Innovative lighting

The LED lighting considerably improves the visibility of the operative field. The two Bien-Air monobloc optical glass rods provide ideal distribution of luminous intensity. There is virtually no shadow area. Diffusing a natural white light similar to daylight, the LED has a service life 10 times longer than that of a traditional light bulb. Moreover, no infrared emissions mean no overheating of the handle.

You mentioned ergonomics?

## When form matches function

Special attention has been paid to the design. The new line of Bien-Air turbines is the culminating expression of this. Our turbines are characterised by their thin shape and light weight. The perfect union of form and function?

## A comprehensive product range

The BORA and PRESTIGE lines are available in versions with LED light and without light, or again in a carbon fibre version with LED light. The BORA turbines feature extraordinary power, while the PRESTIGE turbines are fitted with a small-sized head ideally suited for delicate work.

## Excellence made in Switzerland

Bien-Air has always focused its efforts on the quality of its instruments. That is why all our turbines are provided with diffusers with 3 separate air/water spray ports. Numerous tests have demonstrated the excellence of this choice. It offers you the best nebulisation and optimum bur cooling.

Ceramic ball bearings are standard equipment on our turbines: a guarantee of reliability and long life.

In a Bien-Air instrument, each detail, each material is designed to give you satisfaction, for a long time.

## PRESTIGE

# BLACKLINE. A NEW BENCHMARK FOR ERGONOMICS, PERFORMANCE AND DURABILITY.

Imagine an incredibly light instrument, refined, efficient and rugged at the same time.

Inspired by the latest technological breakthroughs in the most demanding environments, such as aerospace, sailing and competitive sport, the BLACKLINE product line incorporates a carbon fibre handle on the BORA L and PRESTIGE L turbines.

Thanks to the carbon fibre, these turbines are far lighter and easier to handle. Moreover, the carbon fibre offers improved resistance to wear, friction, torsion and impacts.

The BLACKLINE turbines are all provided with LED lighting for excellent visibility of the operative field.

The new BLACKLINE product line from Bien-Air: a new benchmark for ergonomics, performance and durability.

Benefits of the BLACKLINE product line:

- greater lightness and ease of handling
- a LED light offering optimum visibility and a 10 times longer service life
- a material resistant to wear, friction, torsion and impacts

## TURBINES BORA

BORA L BLACKLINE turbine

Carbon fibre and metal handle

BORA L and BORA L BLACKLINE turbines

LED light offering optimum visibility and a service life 10 times longer than that of a light bulb

Triple-spray diffuser with three separate air-water ports for optimum bur cooling.

Ceramic ball bearings for longer service life.

Speeds up to 310,000 rpm, recommended air pressure 2.7 bar.

The monobloc optical glass rods and water non-return valve integrated into the handle are designed to resist numerous sterilisation procedures.

The large push button with anti-heating system facilitates bur chuck loosening.

REF 1700303-001 BORA L BLACKLINE with 4-hole Unifix coupling, with air non-return valve

REF 1600637-001 BORA L BLACKLINE without Unifix coupling

REF 1700305-001 BORA L with 4-hole Unifix coupling, with air non-return valve

REF 1600638-001 BORA L without Unifix coupling

REF 1700188-001 BORA with 4-hole Unifix coupling, with air non-return valve

REF 1700187-001 BORA with 3-hole Unifix coupling, with air non-return valve

REF 1600381-001 BORA without Unifix coupling

## TURBINES PRESTIGE

PRESTIGE L BLACKLINE turbine

Carbon fibre and metal handle

PRESTIGE L and PRESTIGE L BLACKLINE turbines

LED light offering optimum visibility and a service life 10 times longer than that of a light bulb.

Small-size head specially designed for very delicate work. PRESTIGE can easily gain access to the most difficult places.

Triple-spray diffuser with three separate air-water ports for optimum bur cooling.

Ceramic ball bearings for longer service life.

Speeds up to 315,000 rpm, required air pressure 3.25 bar.

The monobloc optical glass rods and water non-return valve integrated into the handle are designed to resist numerous sterilisation procedures.

The large push button with anti-heating system facilitates bur chuck loosening.

REF 1700304-001 PRESTIGE L BLACKLINE with 4-hole Unifix coupling, with air non-return valve

REF 1600640-001 PRESTIGE L BLACKLINE without Unifix coupling

REF 1700306-001 PRESTIGE L with 4-hole Unifix coupling, with air non-return valve

REF 1600641-001 PRESTIGE L without Unifix coupling

REF 1700186-001 PRESTIGE with 4-hole Unifix coupling, with air non-return valve

REF 1700185-001 PRESTIGE with 3-hole Unifix coupling, with air non-return valve

REF 1600379-001 PRESTIGE without Unifix coupling
